The Secret

of the universal success of Brown's Iron Bitters is simply this: It is the best Iron preparation ever made; it is compounded on thoroughly scientific, chemical and medicinal principles, and does just what is claimed for it—no more and no less.

By thorough and rapid assimilation with the blood, it reaches every part of the system, healing, purifying and strengthening. Commencing at the foundation it builds up and restores lost health—in no other way can lasting benefit be obtained.

25 Dearborn Ave., Chicago, Nov. 7. I have been a great sufferer from a very weak stomach, heartburn, and dyspepsia in its worst form. Nearly everything I ate gave me distress, and I could eat but little. I have tried everything recommended, have taken the prescriptions of a dozen physicians, but got no relief until I took Brown's Iron Bitters. I feel none of the old troubles, and am a new man. I am getting much stronger, and feel first-rate. I am a railroad engineer, and now make my trips regularly. I can not say too much in praise of your wonderful medicine. D. C. MACK.

BROWN'S IRON BITTERS does not contain whiskey or alcohol, and will not blacken the teeth, or cause headache and constipation. It will cure dyspepsia, indigestion, heartburn, sleeplessness, dizziness, nervous debility, weakness, &c.

Use only Brown's Iron Bitters made by Brown Chemical Co., Baltimore. Crossed red lines and trademark on wrapper.

Northern lights—aurora borealis—started to blaze last night about 12 o'clock, but the attempt was abortive and died out in a flickering glim; but if this clear cold weather continues they will make a grand display before long. They have been magnificently brilliant in the Eastern States recently.

PERSONALS.

Tom Clark is in from the North.

Hon. L. L. Crockett is in town to-day.

Ben F. Small has gone on a trip to the Bay.

Joe Giles of Winnemucca is a guest at the Palace.

M. J. Dillman returned yesterday from a visit to Sacramento.

Wm. B. Todhunter, the great beef autocar, was in town to-day.

H. B. Woods of San Francisco is registered at the Depot Hotel.

M. M. Fredrick, the thrifty Comstock jeweler, was in town this morning.

J. M. Mateer, captain of the guard at the State Prison, was in town last night.

H. M. Yerington and wife, Carson, were passengers for San Francisco last night.

A dispatch states that Mrs. J. W. Mackay is recovering from a dangerous illness in Paris.

Hon. P. N. Marker, State Senator elect, was in town last night. Also Senator H. F. Danberg of Douglas.

B. F. Carrick is in town to-day. Ben's many friends are pleased to see him enjoying the air of freedom once more.

H. P. Cohen, business manager of the *Enterprise*, came down from Virginia last night. Nothing has been missed, so far.

F. E. Howard, the sewing-machine man, started out this morning with a pair of horses and light wagon for Truckee, and will endeavor to cross the mountains. It is a rough trip and not entirely devoid of danger.

Miss Ella McNeely is agent for all the standard literary works, and any orders left with her will be promptly filled. She is now canvassing the town for "Gems for the Fireside," a volume of over 700 pages of choice selections of prose and poetry. The book is beautifully illustrated, and is well worth the subscription. Read Miss McNeely's "ad."

SCIENTIFIC PROGRESS.

A Condensation of Prof. Lyser's Lecture at the Late State Institute.

Had some celestial visitor stepped upon our small orb 882 years ago he would have witnessed an extraordinary scene. The morning dawned upon a world whose weary eyelids had not known slumber. The population of the great cities were astir and in motion toward the open fields. Traveling toward the cities were swarms of countrymen, seeking the companionship of human kind. The city sought the spacious freedom of the country; the country hastened for the comforts not yielded by isolation. It was one vast moving day for the world, yet more astonishing than all, no man appeared to carry with him any of those treasures so universally valued. All races, all ranks, all conditions, and all ages were moving. All mankind seemed animated with the same idea. Some moved as under a spell of terror, scarcely knowing how to drag along their palsied limbs. Some, with imploring, reverent gaze fixed upon the upraised symbol of salvation, stepped onward with scarcely less apprehension. Men's ruling passions were repressed by an overmastering fear—the fear of a common death, swift, certain, annihilating. It was the first day of the year 1000—the *Dies Irae*—when, according to prediction, the wrath of a justly offended God would wipe from existence a sin-stained and unrepentant world. And indeed had the last trumpet sounded,

THE RECORDING ANGEL.

Would have found but too much to enter on the ledger of life and death. The time was the midnight of the Dark Ages. Murder and rapine were rampant through the earth. Strength was the God men worshipped. Robbers built their homes on inaccessible peaks and made laws for weaker men. Superstition was a stronger incentive to action than religion; nay, was the only religion of the multitude. When the pessimist of to-day whines out his miserable interrogatory—"Is life worth living?" and dolorously sighs for the "good old times," you can point him to these days when the weak could own nothing in the world, not even wife or child; when the brute cattle in the fields were worth more than men and women; when the Bible was used as a so-called guide for the use of the thumb-screw and the rack and a thousand horrible instruments, the sight of which to-day would make your blood run cold and your eyesight dim. We, in this generation, have been brought face to face with an experience very similar to that of our ancestors of the 11th century. The end of the world has been predicted, too, for this age and by more or less reliable authority. To Mother Shipton's prophecy few intelligent people paid any attention; but when eminent astronomers like Prof. Piazzi Smyth or Prof. Richard A. Proctor speak of planetary conjunctions and cometary influences, it is a signal proof of growth, of virtue, of intelligence and of thought, that the whole world does not take alarm. It is science, and the wonderful spread of scientific knowledge among the masses that has given man a wider, juster insight into the laws of the universe and imbued him with a deeper confidence in his Maker. We stand to-day, as Newton used to say, on

THE SHOULDERS OF GIANTS.

This is why our horizon is wide; why we see so much farther than our ancestors. We often hear that faith in the goodness and wisdom of our Creator is daily growing less. How signal an instance is our generation to the contrary! The men of to-day go about their ordinary avocations, confident that over the vast machinery of our universe reigns a Divine intelligence that works by the steady action of law. They believe in no unheralded catastrophe, for they know that if causes to destroy the earth were set in operation to-day, the final result might be cycles hence. In truth we are assured that in a few years (a million or so) our earth will rotate no longer. It has been found to have been going slower and slower as the centuries have gone by. The moon lifts the great tidal wave of the ocean; that wave, as it travels from east to west, acts like a gigantic brake upon the earth. So, slowly, indeed, but surely, it is losing speed, until the day will come when it stops forever. Our sun, too, the author and supporter of our system—the time approaches when the sun itself shall

"Grow dim with age
And nature sink with years."

INDUSTRIAL PROGRESS.

In reviewing the scientific progress of this country, the entire field is too vast for that brief view that an evening's time only permits. In our day even such a master mind as that of a Bacon would shrink from attempting to master all the stores of knowledge and wisdom. In every art and science this century has made giant strides. A single generation has seen progress in industrial science so wonderful that the story of Aahidin's wonderful palace shrinks into insignificance. With two words, "Steam and Electricity," we can manifest the superiority of our time over the fabled age of gold, or the more real culture and civilization of Greece and Rome. Within 100 years Dr. Priestly by his discovery of oxygen facilitated and so cheapened the manufacture of steel

that the whole mechanical industry of the world was revolutionized, and the comfort and enjoyment of human life doubled beyond that of any preceding age. In physics the century has witnessed the discovery of chemical electricity, of magnetism and latent heat, with all their multifarious applications. The corpuscular theory of light has given place to the undulatory. The investigations of Wedgwood and Sir Humphrey Davy have resulted in the photograph and the safety lamp, and a hundred other no less

VALUABLE INVENTIONS.

Malus, Young and French discovered the polarization of light. Oersted and Faraday discovered electro-magnetism; and, beginning with Count Rumford and Dr. Joule and continued by Dr. Tynall and others, the wonderful law of the conservation of energy was demonstrated to the world. In chemistry the atomic theory has been established, the number of unknown elements increased to sixty-three, and these elements themselves conjectured to be formed of one homogeneous element pervading all space. The sciences of biology and geology have almost been created in one day. In this necessarily brief review, nothing more need be said than to name the steam engine, the locomotive, the electric telegraph, the various labor-saving machines able to perform the work of 3,000,000,000 men; the printing press, the electric light, etc. Their names are legion, and their invention or improvement has been the work of this age. But it is neither to the realm of physics, nor chemistry nor geology that I wish to invite your attention. It is to a subject of infinitely greater moment. To sentient creatures placed on this sphere there can be no question more engrossing than

"HOW CAME THIS WORLD HERE?"

"Whence came man?" "Whither does he go?" To the last question science affords us reply. With the modesty that springs from wisdom she leaves the answer to Faith and Hope. But even on this point she makes us one solemn assurance. Can it be that the genius of man, which has successfully solved the problem of the universe, shall perish from the earth? It is this problem whose solution has been in progress 6,000 years, one which has furnished to man the opportunities of his mightiest triumphs—a problem whose successive developments have demonstrated the immortality of mind, and whose sublime results have vindicated the wisdom and declared the glory of God. It is to the problem of the constitution of our own world, its probable origin and development, to the life which first appeared on its surface, and its growth, improvement and culmination as solved by a most glorious galaxy of sages; from the Chaldean shepherds watching the stars from the plains of Shinar to Herbert Spencer formulating the researches and knowledge of all the centuries in his

[HERBERT LAW OF EVOLUTION.

This doctrine of evolution is not new though. Aristotle pointed out that we can find an unbroken chain from the lowest plant to the highest animal, each group being separated from the next by very slight differences; nor can we tell, he said, where plants and animals begin, some forms in some respects possessing the characteristics of both. Pythagoras, 2500 years ago, announced that, first, solid land has been converted into sea; second, sea has been changed into land (shells); third, valleys have been formed by running water, and hills washed into the sea. And so on, giving some of the most important facts of geology and meteorology. The peculiar merit of the 19th century philosophy is this: While the ancient Greeks had some idea of the continuity of life on the globe, while Goethe in his "Metamorphosis of Plants" first showed how plants are multiplied and established, while Lamarck clearly outlined the development of animals, and Von Baer, by his studies in embryology showed that the law of embryological development is similar throughout the animal creation, it was left to Herbert Spencer and the past 50 years to show that in the creation of a world, as in the creation of a human being, in the development of a government as in the progress of art, or science, or literature, matter and mind would grow and expand and become more complex according to the law incorporated with their original constitution by an OMNIPOTENT CREATOR.

It has been the fashion in the past to call the doctrines of Spencer and Darwin and Huxley atheism, or at least Deism not consistent with the doctrines of Christianity. This spirit is rapidly dying out. Evolution does not dispense with a Divine Intelligence in the economy of the universe. There should be, and need be, no conflict between science and religion. In tracing the chain of astronomical progress the mind loses itself far back in the clouds and mists of antiquity. How deep must be our admiration for the genius of the first astronomer who worked out his sublime conclusions from the peak of some mountain without the aid of a single instrument! A glance only can be given to the work accomplished by these early investigators who sailed across the unknown sea of science without rudder or compass, without sail or light. They discovered the measure of the year, the revolution required for the sun, to make a revolution around the earth. They learned the cause of eclipses and could predict them. They proclaimed the spherical form of the heavens, and they discovered the procession of the equinoxes. Then human powers aided could go no further, and their

explorations stopped and civilization, being swept away by the northern barbarians, the light of knowledge and culture went out in a midnight of 1000 years of

IGNORANCE AND SUPERSTITION.

During the 16th, 17th and 18th centuries with the art of paper making and the invention of printing, the Dark Ages of Europe passed away. Modern science began to build a magnificent edifice on the foundation selected by ancient philosophy. The work of Copernicus, Ptolemy, Galileo, Kepler and Newton, brought us step by step to the grand scientific climax of the present day. The lecturer then fully and most vividly explained the nebular theory of La Place and Sir John Herschel as to the evolution of our world from nebulous matter. The beginning of life as expounded by Darwin was then followed up, and the various geological periods explained. In conclusion Prof. Lyser urged his hearers to a study of nature. "In all her moods she has something for us of the greatest moment. And we need not fear but what the study will lead us up to Nature's God." The lecture concluded with great and lasting applause and the large audience dispersed feeling that an hour and a half had been spent listening to an address teeming with knowledge of the best and most elevating character.

Township Officers.

The following shows the total vote cast for township officers at the last election and the majorities received: W. H. Young, Justice of the Peace, 493, against W. A. Waldo, 263. Young's majority, 230. For Constable, R. Nash, 464; G. W. Humphries, 276; J. D. Shaw, 74. Nash's majority over Humphries 118 and his majority over Shaw 44. For Road Supervisor, A. Thompson, 464; John Blinn, 288. Thompson's majority, 176. For School Trustee, long term, F. R. Waggoner, 406; M. Hawcroft, 344. Waggoner's majority, 62. School Trustee, short term, W. H. Gould, 486; E. Nowatney, 285. Gould's majority, 151.

Pardoned.

B. H. Carrick, the defaulting ex-Treasurer of Storey county, was yesterday pardoned by the State Board of Pardons—Governor Kinkaid, Justice Leonard and the Attorney-General voting in favor of, and Justices Hawley and Belknap against, the pardon. The prisoner's fine—amounting to \$21,006, the sum of his defalcation—was not remitted.

The application of John L. Crawford, sent from White Pine for 6 years for grand larceny, was granted; also that of M. Marks, sent from Lander county for 10 years for an assault with intent to kill.

The Beautiful English Woman.

Mrs. Langtry, the professional English beauty who has the whole of New York struck by her charms, says she dearly likes America and Americans. But she will never realize what sweet things we have in this incomparable land of ours until she comes to Reno and absorbs a few of those exhilarating punches at Chase & Thyes. When she sees Duse's lily-white fingers manipulating a crystal glass, she will murmur, "How esthetically beautiful!" and proceed to gargle the interior of her alabaster neck with the delectable cordial.

Death of an Old Pioneer.

Judge A. M. Walker, an old and respected citizen of Truckee, Cal., died at that town this morning at 6 o'clock, of typhoid fever. Judge Walker has been a resident of Nevada county for a great many years. He was a lawyer by profession, and a very kind-hearted, genial gentleman. May he rest in peace until called upon to strike his balance on the books of the mystic future, when the "red ink" is sure to be on his side of the account.

An Old Claim Relocated.

Some parties are reopening a mining claim near Steamboat Springs that had considerable prospecting done on it in 1892-3, but the Comstock was all the rage then, and nothing could be done with it. After twenty years it has been re-located and work resumed. A ledge three to five feet wide has been exposed. There is apparently a large body of ore at hand. Assays give from \$70 to \$90 per ton in silver, and \$15 to \$25 in gold.

A Good Sign.

Treasurer Boyd says taxes are coming in much better than last year. He says he has received 100 per cent. more of the taxes due than was paid in the corresponding month last year. It is a good sign to see everybody paying up.

The Horse Boys' Dance.

The members of Washoe Horse No. 2 will give a dance to-night at Kimball Hall, and they invite all their friends to join them, for a single half-dollar. Hastings and Fredrick's band will furnish the music.

Sad News.

Mrs. T. K. Hyams yesterday received the sad news of the death of her sister, Mrs. Mary Sanders, of Delhi, N. Y.

Taxes.

Taxes will be delinquent on Monday, Nov. 20th. "A word to the wise," etc.

THANKSGIVING.

Governor J. H. Kinkaid Issues His Proclamation.

The people of Nevada have reason to be thankful for the measure of prosperity enjoyed during the present year. Pestilence, which has raged in other localities, has left us unvisited. Devastating tempests, which have swept over other sections, destroying life and property, left us unmolested. Our industries thrive and our prospects brighten. The nation is prosperous and at peace with the world. Let us be grateful for these blessings and beseech their continuance.

In accord with the proclamation of the President of the United States, I, John H. Kinkaid, Governor of the State of Nevada, do hereby designate Thursday, the 30th day of November, A. D. 1882, a day of thanksgiving to Almighty God for the privileges and benefits enjoyed by us as a people, and urge its proper observance by all within our borders.

JOHN H. KINKAID,
Governor of Nevada.

LIEBIG MALT EXTRACT.

RECOMMENDED BY PHYSICIANS of the highest eminence on both sides of the Atlantic, as an Irritable Tonic and Restorative in cases of General Debility, Nervous Prostration, Exhausted Constitution and Female Weakness, it gives back the bloom of youth.

NURSING MOTHERS, who suffer from poverty of milk, will find it a specific for their trouble. It stimulates the system, sharpens the appetite, invigorates and builds up the entire system, and ensures a generous flow of milk.

WEAK AND SICKLY CHILDREN, who suffer from indigestion and weakness, the result of disease, over-study, or nervous strain, will derive substantial benefit from its use. It restores the system to its normal condition and gives back the bloom of youth.

INVALIDS AND CONVALESCENTS will find it admirably adapted for sustaining life, and restoring lost strength. When the stomach is weak and refuses other nourishment the Extract will prove an excellent substitute for food. It neither purges upon the appetite nor offends the system.

DELICATE FEMALES, who suffer from the weakness of their sex, will derive lasting relief from its use. It improves the digestion, purifies the blood, stimulates the appetite, and restores the system to its normal condition and gives back the bloom of youth.

WEAK AND DELICATE PERSONS GENERALLY, who require some artificial restorative—and especially those who are inclined to Consumption—will find this preparation exactly suited to their needs. It is a specific for the Coughs and Nervous Affections usually incident to a low state of the system.

AS A FLESH RESTORER it possesses the highest value. The whole tendency of its action is to stimulate the digestion of food, and its effect is invariably to give fullness and roundness to the female form, and robustness to the masculine frame.

THE LIEBIG MALT EXTRACT is a pure concentrated Fluid Extract of Malt, agreeable to the taste, and free from alcohol. It is readily retained on the stomach and contains none but wholesome and nourishing ingredients. The genuine preparation bears on the label a fine engraved likeness of Prince von Linsow, and a facsimile of his signature, as well as that of A. VOGLER & CO., Barmen, Prussia, Sole Agents for America.

Buttons, Studs, Finger Rings, Spectacles, Gold, Silver and Nickel Watches, Opera and Field Glasses, Chains, Fobs, Silverware, Closets, Etc.

And all articles usually kept in a first-class jewelry establishment. Fine jewelry is made to order. Fine watches repaired in first-class style, and all is warranted strictly as represented. Do not omit to call before going elsewhere. Respectfully,
WM. GOEGGEL,
Virginia St., Reno.

MIDDLE-AGED MEN.

There are many of the age of thirty and sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation and a weakening of the system in a manner that cannot account for. On examining the urinary deposits aropy sediment will often be found, and some small particles of albumen will appear, or the color will be of a thick milky hue, again changing to a dark and turbid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. DR.
